

Construction Project Manager/Estimator

The Position:

We have an immediate, full-time opening for a Construction Project Manager/Estimator to join our team of professionals.

Our Company:

Friede & Associates is a fourth-generation construction company that traces its beginning to the early 1900s. With both carpentry and concrete crews still a part of our business, our 45-person firm has completed projects in nearly every industry, and with virtually every type of construction, including tilt-up, structural steel, pre-engineered steel, panelization and wood construction. But today, our firm is best known for its work from The Wisconsin Dells/Lake Delton area south to Madison and beyond.

Benefits:

Friede & Associates offers Health Insurance, Dental Insurance, Short-Term Disability Insurance, Life Insurance, Section 125 Flex Plan, 401K Plan, Safety Incentive Plan, and Profit Sharing.

Responsibilities:

The Project Manager/Estimator will coordinate the entire construction process from preconstruction through close-out. The PM will work with the Business Development/Preconstruction departments and will be responsible for the overall success of the project from start-to-completion. The PM is the primary point of contact for the owner during this time period as well as through post-construction and is responsible for client satisfaction.

The ideal candidate will be responsible for all aspects of the construction process to effectively prevent and/or manage risk, and to seek solutions to problems as they arise. Responsibilities include planning, estimating, subcontractor selection, scheduling, budgeting, contract design/approval, managing subcontractors and vendors, contract negotiations, managing client expectations, dispute resolution, and procurement of materials/supplies. Excellent communication skills are a must!

Additional Important Attributes:

- Ultimately responsible for project success measured by client satisfaction, budget maintenance, profitability, and schedule adherence.
- Must have a proven track-record for successful project delivery, and client satisfaction for commercial projects over 3+ years.
- Competent to manage all aspects of a construction project on a stand-alone basis with only additional support from upper management and other team members.
- Expected to have enough experience and depth of knowledge in managing construction projects that he/she is able to be the driving force behind providing solutions to problems that are presented, and capable of unifying key team members to advance the solution.
- Competent and proficient in writing scopes of work into subcontract exhibits.
- Ability to competently create a CPM schedule and modify it according to the needs of the project.
- Understand the fundamentals of scheduling to provide guidance to project staff.
- Able to partner with the project superintendent and lead the project as necessary in an effort to maintain project schedule.
- Understand how to diagnose and manage risk on projects.
- Able to drive the project schedule with all of the players involved, including team members, subcontractors, owners, owner representatives and designers while still maintaining the strong relationships required for a unified team approach.
- Ability to manage project close-out—including holding initial meetings with owners regarding the close-out process and managing the project team to ensure a timely close-out.
- Must have a current driver's license valid the past 12 consecutive months and an acceptable motor vehicle record (no DUIs in the past 36 months).
- Background checks are a required part of our hiring process.

Necessary Education & Experience Qualifications:

- High School Diploma (Bachelor's Degree in Civil Engineering or Construction Management is preferred.)
- Minimum 3+ years of project management experience in new commercial construction and renovation.
- Experience using Bluebeam, Sage 300, Microsoft and project management software a plus.
