

Sundara Woodland Retreats

Scope: New Spa Facility
Location: Wisconsin Dells, Wisconsin
Designer: General Engineering Company

As part of the expansion of their spa services, The Wilderness Resort sought to develop another guest lodging option for their clients—the Sundara Inn & Spa. Friede & Associates, with assistance from its design partner General Engineering Company, worked with the owners of The Wilderness Resort to develop two, four-unit buildings, along with an 80-foot elevated connector and a 1,200-square-foot quiet room situated behind the main spa complex.

The units include a main suite that features a great room, a large bedroom, and specialty shower and bath. These units also include an outdoor patio that features private hot soak tubs for up to six guests. A truly unique element of the project was the development of a quiet room that allows guests to relax in front of a large glass wall that overlooks a wooded forest with local wildlife.

The award-winning project took advantage of a panelized wall system which allowed Friede crews to self-perform nearly 40% of the project, while building throughout the winter months.

This project was recognized by the Associated Builders and Contractors (ABC) of Wisconsin as a 2018 Gold Project of Distinction.
