

## Therapy Without Walls

Scope: Therapy Office Renovation

Location: Reedsburg, Wisconsin

Designer: Mente Engineering

Therapy Without Walls is a 5,100-square-foot remodel of an existing furniture store into an office building. The renovation project includes a new entry vestibule with cultured stone, new offices, therapy rooms, and meditation rooms. The Friede team also constructed a large break room and an extra-large dual-purpose conference room for all employee meetings. Work included carpentry, drywall, wooden doors, hollow metal frames, hardware, plumbing systems, a new HVAC system, and a new electrical panel and electrical system.

This project was recognized by the Associated Builders and Contractors (ABC) of Wisconsin as a 2017 Gold Project of Distinction.

“Going with Friede was the best choice our agency made with the remodel of our new building. Friede staff are knowledgeable about every step in the building process, and were available and responsive to my requests. The quality of the work completed was amazing and we have gotten nothing but positive feedback from staff and members of the community.”
