- Pre-engineered metal buildings & erection
- Elevators
- Cranes & hoists
- Plumbing
- HVAC
- Electrical
- Fire Protection
- Carpentry
- Concrete

Who is Friede & Associates?

Friede & Associates is a commercial general contractor celebrating 75 years in commercial construction and more than 100 years in business. We generally serve the southern two-thirds of the State of Wisconsin but do go outside that target area if requested by our existing clients.

What work do we typically self-perform?

Friede & Associates' crews include superintendents, carpenters, concrete finishers and certified welders in our field operations. We typically will perform all carpentry (rough & finished) and concrete on our projects and will also perform incidental steel erection/assembly within larger projects. It's important to note that project schedules and our workforce commitments often result in us subcontracting for both carpentry and concrete.

Typical Projects

We typically perform projects between \$500,000 - \$5,000,000 when completed. More than 90% of the time we have been pre-selected as the general contractor and will team up with an Architectural/Engineering firm for project design and development.

How do you get on our subcontractor list?

Complete the subcontractor pre-qualification form. For more information about becoming a part of the Friede & Associates subcontractor network, please contact:
